

ASSESSOR INITIAL TRAINING

COURSE SUMMARY - EU 2015/340

GATE Aviation Training (GATE) has designed a new Assessor training course that places the ATCO at the centre of the training concept. We use modern learning principles and proven pedagogical techniques to provide ATCOs with high-class theoretical knowledge and assessment skills necessary to apply for an Assessor endorsement.

The training course is designed to provide participants with an understanding of the EU 2015/340 regulation and operational competence assessment schemes including different assessment methods.

GATE recognises the function of Assessors being very important for both the Civil Aviation Authority and the Air Navigation Service Provider. The training course addresses the psychological influence for both the Assessor and for colleagues once such a function is achieved. It addresses the differences between colleagues, OJTIs and CTIs towards the Assessor role and influence.

GATE Aviation Training academy and the initial Assessor training course are certified by the Danish Civil Aviation Authority in accordance with Commission Regulation (EU) 2015/340.

PREREQUISITES
