

ASSESSOR REFRESHER TRAINING

COURSE SUMMARY - EU 2015/340

GATE Aviation Training (GATE) has designed a new Assessor refresher training course that places the Assessor at the centre of the training concept. We use modern learning principles and proven pedagogical techniques to help Assessors to develop personally and to refresh their knowledge and assessment skills necessary, enabling the revalidation of their Assessor endorsement.

The training course is designed on a participant-based learning concept, meaning once participants have achieved an endorsement as an Assessor (CAS), we offer a modern learning environment to achieve even higher standards in the respective organization. We expect the participant to engage in various discussions initiated by our professional instructors.

GATE makes a difference with the introduction of simulation at the Assessor refresher course. The use of a simulator gives us the opportunity to address previous experiences and new methods for Assessors under supervision. We believe simulation exercises between experienced colleagues will lead to a wider understanding and exciting discussions.

GATE Aviation Training academy and the Assessor refresher training course are certified by the Danish Civil Aviation Authority in accordance with Commission Regulation (EU) 2015/340.

PREREQUISITES

- ATCO license in accordance with Commission Regulation (EU) 2015/340
