

SUPERVISOR COURSE (SUP)

COURSE SUMMARY

Our Supervisor Course (SUP) is designed to build up a solid leadership foundation for Managers, Supervisors and ATCOs transitioning into these roles. They are the linchpins in any operational environment and need skills to analyse, establish and execute decisions in a fast-moving environment. These skills are different to providing Air Traffic Services and are needed for supervisory roles in an operations room.

To be able to lead a team, the organisation and operations room needs leaders. Our Supervisor training is vital for organisations who want their supervisory staff to be robust within areas such as leadership, communication, safety culture, performance culture, and team performance.

Our training concept offers participants opportunity for personal development, new skills, deeper understanding for leadership etc.

GATE Aviation Training academy is certified by the Danish Civil Aviation Authority in accordance with Commission Regulation (EU) 2015/340.
